

The RW4

More than a “read / write” device, the RW4 detects, reads, generates, archives and clones many transponder keys and electronic clonable keys.

The RW4 Transponder Key Duplicator is **capable of cloning Texas Instruments® (TI) encrypted transponders** when used with Ilco® and/or Silca® electronic TI encrypted transponder chips and the TI fixed code transponder chips thus eliminating the need to have both “master(original) keys, and will also eliminate the need for on-board programming.

- Identifies transponder keys
